Immunization Program Told

Immunizations against both tetanus and diphtheria will be given by the County Health Department in its school immunization program this fall, according to Dr. Roy O. Gilbert, County Health Officer.

Inoculation against the two diseases will be given simultaneously by the use of a combined diphtheria-tetanus toxoid, and will be available for school children through the twelfth year of age, the Health Officer said.

Parents may bring their pre-school children and infants to the County Health Department Health Centers for immunization against diphtheria, tetanus and whooping cough, if they are not able to secure such service from their family physicians.

Despite curtailment of the school smallpox vaccine program last year, the County Health Department gave a total of 207,528 immunizations against diphtheria, whooping cough and smallpox, in the schools and in its Health Centers.

In addition, immunizations against typhoid fever, measles and other communicable diseases totaled 11,182.

The school program for vaccination against smallpox will be scheduled for later in the school year, Dr. Gilbert said.

Hi-Lites Of Seaside Heights

By GRAYCE RYCKMAN
Frontier 5-2410

If I can shake the green-eyed monster off my shoulder, I have several wonderful trips to tell about that some of our neighbors have made recently.

Frank and Dee Callahan of Binglewood Rd., for instance, left Friday evening, the 15th, for Las Vegas, and returned Sunday evening, the 17th. They went by plane and rented a car while there to see the points of interest, especially Boulder Dam.

They stayed at the Las Frontier Hotel and took in much of the night life. It was their first real "stepping out" since little Vicky Lynn was born, and both of them had a wonderful time. Incidentally, Dee's mother and father, Mr. and Mrs. Price, stayed with Vicky Lynn while they were away.

Then there is the Dwyer family: Fran and Dorothy and three of their four children, Bobby, Billy and Dolores, who returned Tuesday the 19th from a trip to Reno and Lake Tahoe. They had a grand time, but Dorothy came home a little worn with sunburn, mosquito bites, and a sore foot.

Have you driven by 8234 Binglewood Rd. and noticed the lovely room and fireplace being scheduled for the Dwyer home? Really nice . . . with huge glass windows all across the back.

Las Vegas and Boulder Dam were visited by another Seaside Heights family . . . Esther and Joe Johnson and son Bobby. They left the 22nd and returned Monday. Joe and Esther are on their vacation and are spending most of their time in building a wall and walk. But they have a beautiful new car and just had to give it a trial run.

See what I mean about the green-eyed fellow?
Floyd Holstin and son Bobbie spent week-end before last at Camp Pepperrine. Bobby tried to teach and explain some of the things he learned while in New Mexico at Camp Philmont this summer. He is a recog-

nized junior leader and Floyd is the junior leader advisor of the South Bay Scouts.

June and Jack Chommie of Zakon Rd. left last week for Utah. Sort of a triple purpose trip: vacation, visit to June's sister, and talking with other law professors at the University with the Brady family on Doris Way.

Everyone knowing Mae and Ralph Ziskin is very sorry to have to say goodbye to them. They, and their son Joel, are going back to Delano after being here only a year. As you probably know, Mr. Ziskin was the teacher in room 14 at Seaside School last year. And Mae is one of those willing to work neighbors, helping in Red Cross, Community Chest and Polo collections. Both were swell neighbors; surely sorry to see you leave.

Well, sure enough, Mrs. M. Moffett had her baby last week. As reported before, Bob and Tabby are new residents on Macafee Rd. Little 2-year-old Scott now has a baby sister, born at the Hollywood Presbyterian Hospital, Monday Aug. 18. She weighed 8 lbs., 3 oz. and has been named Wendy. So congratulations, Moffets. And laurels to Esther Steele, their next door neighbor, who has been such a helping hand to them.

On the less happy side we have had two accidents on Zakon Rd., neither automobile mishap. Johnny Weber, age 9, was brought home by the county lifeguards last week. He had stepped on a large piece of bottle glass in the sand and cut his foot wide open, requiring many stitches. He is still hobbling around.

DANGER SNAKES
Of 200 types of snakes found in the United States and Lower California, less than 17 per cent are dangerous to man.

Water Officials To Discuss Salt Water Intrusion

A. F. Bush, assistant professor in the department of engineering at UCLA, will report on laboratory test work in connection with the fresh water barrier experiments to the West Basin Water Assn. meeting this evening at the Palms Yards Country Club, according to Carl Fossette, general manager.

Up for discussion, according to Fossette, will be the need for several test or observation wells in the Harbor area to enable the association to warn water producers of the area on the time and extent of salt water contamination.

Virtually nothing is known at present of the extent or rate of ocean water intrusion into fresh water bearing formations in the southern portion of the West Basin, Fossette said yesterday.

Demands on the water from the basin during the past few years have reduced the fresh water tables to as low as 90 feet below sea level. Approximately 50,000 people and many industrial plants are served from this diminishing basin, the official said.
